

SAMI MAWASS

Analytics Engineer | BI Developer

Tripoli, Lebanon · +961 79119655 · sami.mawass@outlook.com · [linkedin.com/in/sami-mawass](https://www.linkedin.com/in/sami-mawass)

PROFESSIONAL SUMMARY

Analytics Engineer and BI Developer with 4+ years building end-to-end analytics on the Microsoft data stack. Strong in SQL, dimensional and semantic data modeling, and Power BI, with hands-on delivery of governed, production-grade reporting for enterprise, government, and FMCG clients. Expanding into cloud data warehousing and analytics engineering with Microsoft Fabric to design reliable, self-service analytics. Microsoft-certified across Power BI, Azure data fundamentals, and Fabric analytics engineering.

CORE COMPETENCIES

Semantic & Dimensional Data Modeling · SQL Development · Power BI Semantic Layer · Row-Level Security · Stakeholder Partnering · Self-Service Analytics Enablement · Team Mentoring · Microsoft Fabric

TECHNICAL SKILLS

Languages & Query: SQL (T-SQL), DAX, Power Query (M)

Modeling & Platforms: Power BI (Desktop, Service, Report Server), Microsoft Fabric, Azure

PROFESSIONAL EXPERIENCE

Analytics Engineer / BI Developer | Cedars BC *2022 – Present · Lebanon*

- Delivered end-to-end BI for enterprise, government, and FMCG clients, from the SQL data layer through to deployed, governed reporting.
- Authored SQL views as the curated data layer feeding semantic models, standardizing business logic and reducing inconsistent reporting queries across teams.
- Extended SSAS Tabular models with new dimensions, measures, and DAX, expanding self-service coverage so analysts could answer questions without engineering tickets.
- Built and deployed Power BI reports to Power BI Report Server, giving stakeholders refreshable visibility into key operational KPIs.
- Administered production access and implemented row-level security (RLS) to meet client governance requirements.
- Mentored BI interns on Power BI development, data modeling, DAX, visualization best practices, and reporting standards, raising the team's delivery consistency.
- Partnered with business stakeholders to translate reporting requirements into well-structured datasets and a maintainable semantic layer.

KEY PROJECTS

Enterprise Reporting Platform, Higher Education, UAE (client anonymized)

- Built the reporting flow from SQL views through SSAS Tabular to Power BI for a UAE national higher education institution (engaged via a leading UAE management consulting firm and an IT managed-services provider), establishing one governed source of truth.
- Owned the production semantic model and report-deployment lifecycle, including security, refresh, and user access on Report Server.

BI & Reporting, FMCG Manufacturer, UK

- Developed Power BI reporting and data models for a leading FMCG manufacturer, enabling business teams to self-serve analytics from a consistent, well-modeled dataset.

EDUCATION

Bachelor's Degree, Management Information Systems Lebanese University, 2019–2022

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (Dec 2025)
- Microsoft Certified: Power BI Data Analyst Associate (Aug 2022)
- Microsoft Certified: Azure Data Fundamentals (Feb 2022)
- McKinsey Forward Program, McKinsey & Company
